

QVidium™ ProMPEG FEC IP to IP Proxy Software

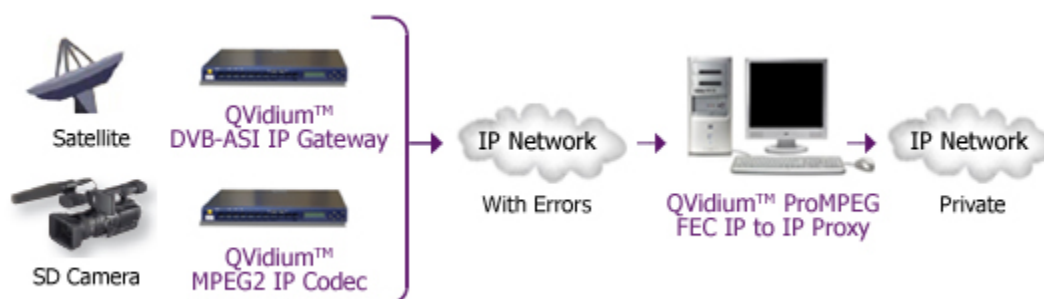

Key Features:

- ▶ Provides better video quality for non-ProMPEG FEC IP receivers.
- ▶ Pro-MPEG Forum FEC Code of Practice #3 Releases 1 and 2
- ▶ Corrects MPEG2-TS video for missing packets
- ▶ Outputs RTP or UDP
- ▶ Outputs multicast or unicast
- ▶ Monitors network for dropped packets.
- ▶ Displays network statistics.

Major Benefits:

- ▶ **Incorporates Pro-MPEG FEC COP #3 Releases 1 and 2:** Fully compliant and interoperable with ProMPEG Forum Code of Practice #3, Releases 1 and 2.
- ▶ **Better video quality:** Proxy recovers missing video packets using ProMPEG algorithm.
- ▶ **Protects investment:** Allows continued use of legacy video over IP receivers.
- ▶ **Cost effective:** Proxy runs on standard PC hardware.
- ▶ **Protocol conversion:** Accepts RTP packets and can output UDP packets to legacy video over IP receivers.
- ▶ **Protocol conversion:** Accepts unicast IP packets and can output multicast (or unicast) packets.

Application Example:
